## Background / Introduction

Business recycling requirements were established in City Ordinance in 1996. Section 9-3.1 requires liquor-serving establishments to recycle glass containers and office buildings with 20,000 square feet or more of office space to recycle office paper, newspaper and corrugated cardboard. To comply with these requirements, businesses need to separate recyclable materials and refuse into separate disposal containers or handle the recyclables in a manner that causes or is intended to cause the collection of the recyclable material with refuse.

The Chief of the Refuse Division is required to prepare and submit an annual report on the progress of the implementation of these requirements. The first report was submitted in July 1997. Subsequent reports were provided orally at City Council committee hearings by request. Comprehensive written reports were submitted annually from 2010 through 2017 to apprise the City Council of the details involved in enforcing these ordinances. This report for fiscal year 2018 provides much of the same information in terms of program and procedural description, with updates to the list of affected businesses and the findings/observations based on recent inspections.

This report is an overview of the division's efforts to implement and maintain compliance among affected businesses. Although not required in Ordinance, the report also includes information about the implementation of requirements stated in Section 9-3.5 for food waste recycling by businesses that generate large quantities of food waste, including restaurants, hotels, food courts, markets, food manufacturers and hospitals. The report also contains information on commercial material disposal restrictions and bans. This information is included to present a comprehensive overview of the overall impact of recycling requirements on the commercial sector.

## Affected Businesses

Ordinance requires most businesses and government agencies to recycle certain types of materials. Although the City encourages recycling of as many materials as possible, it requires that certain materials be diverted from City disposal sites and thereby recycled or composted. As the largest generator of waste on Oahu, the commercial sector has the greatest potential to significantly increase recycling. Businesses that generate large volumes of recyclable materials may also have an opportunity to reduce waste disposal costs by integrating recycling with their waste management system.

Almost every large business on Oahu -- restaurants, bars, hotels, office buildings, shopping centers, retail stores, grocery stores, hospitals, food courts, food manufacturers and processors, golf courses, parks, tree trimmers, auto shops, appliance dealers -- is affected, either directly or indirectly, by the City's recycling requirements. Some requirements identify the types of businesses that are required to establish recycling systems for targeted materials. For example, bars and restaurants are required to recycle glass containers; commercial office buildings, including government buildings, are required to recycle paper; businesses that generate large amounts of food waste, including hotels, restaurants, grocery stores, manufacturers and hospitals, are required to recycle food waste.

Other businesses are affected indirectly by the bans and restrictions of materials at City disposal sites. Although refuse haulers are ultimately responsible for compliance with these requirements, the businesses that generate waste can affect compliance by ensuring that any recyclables contained in their refuse is within allowable disposal limits. Large generators of cardboard, including retail operations, shopping centers, grocery stores and hospitals, are affected by the restriction on cardboard. Large generators of green waste, including golf courses, hotels, condominiums and parks, are affected by the restriction on green waste.

## Recycling Ordinances

Below is a summary of the ordinances relating to mandatory recycling and disposal bans/restrictions. State and EPA laws are additionally noted where applicable.

**Bars and restaurants** serving alcoholic beverages are required to recycle glass containers, effective July 1, 1996. Local recycling companies and collectors may pickup at no charge, and some pay for HI-5 deposit glass. (City Ordinance, Chapter 9-3.1)

*Note: Effective June 1, 2014, the City and County temporarily suspended the applicability of subsection 9-3.1 of the Revised Ordinances of Honolulu, requiring liquor-serving establishments to arrange and provide for the separate collection and recycling of glass containers for any business unable to access recycling services. The suspension applies to non-deposit glass only. Businesses are still required to recycle their HI-5 deposit beverage containers per ROH subsection 9-3.1. Per the ordinance, this subsection may be suspended if the glass recycling service is either unavailable or if the cost of recycling the glass exceeds the cost of disposal at the City's H-POWER waste-to-energy facility or the City's landfill.*

*In April 2014 the City notified all licensed glass recyclers on Oahu of the need to lower its recycling incentive payment for non-deposit glass from the previous year due to the reduced funding from the State Department of Health to operate the non-deposit glass recycling program for fiscal year 2015. Following this notification, all Oahu licensed glass recyclers informed the City that they would no longer accept non-deposit glass for recycling effective June 2014. With no recycling options available for non-deposit glass, the City suspended the applicability of this ordinance until adequate funding is available from the State program to support the recycling of non-deposit glass.*

**Office buildings** with 20,000 square feet or more of office space are required to recycle office paper, newspaper and cardboard, effective July 1, 1996. Local recycling companies collect waste paper for a fee. (City Ordinance, Chapter 9-3.1)

**Hotels, restaurants, grocery stores, food courts, food manufacturers/processors and hospitals** meeting specific size criteria defined by ordinance are required to recycle food waste, effective January 1, 1997. Collection service is offered by collectors, including local hog farmers, for a fee. (City Ordinance, Chapter 9-3.5)

**Green waste** (yard trimmings) from commercial and government generators is restricted and banned from disposal. Commercial and government trucks are limited to a maximum of 10% green waste per load at H-POWER and Refuse Transfer Stations, and green waste is completely banned from disposal at the landfill. Local composting facilities accept this material for a fee and process it for reuse in agricultural and landscaping applications. Generators are also encouraged to consider small-scale, do-it-yourself mulching and composting. Restrictions began in 1994; the ban became effective January 2003. (City Ordinance, Chapter 9-1.7)

**Cardboard** from commercial and government generators is restricted from disposal. Commercial and government trucks are limited to a maximum of 10% cardboard per load. Local paper recyclers charge a fee for cardboard delivered to their facility. Restrictions began in 1994. (City Ordinance, Chapter 9-1.7)

**Tires, auto batteries, white goods and scrap metals** are banned from all City disposal sites, effective 1994. State law bans auto batteries and whole tires, and requires dealers to take back old tires and auto batteries and recycle them. Batteries are delivered to a recycler. City-collected residential tires are delivered to H-POWER where they're burnt to generate electricity. EPA bans Freon-containing white goods from disposal. (City Ordinance, Chapter 9-1.7)

**Electronic waste** is banned from disposal, effective July 2006. Commercial and government e-waste must be processed through "e-waste" recycling companies. State law requiring manufacturer take-back became effective January 2010. In 2015 the law was amended to require electronic device manufacturers to establish drop-off locations for e-waste and prohibited mail-back only recycling options for some devices. (City Ordinance, Chapter 9-17)

**City agencies are required to recycle** newspaper, cardboard, office paper, aluminum, glass, and plastics through the government mandatory recycling program established in 1990 for all City agencies. (City Ordinance, Chapter 9-1.11)

**The City is required to purchase recycled paper products** to support the recycled paper market. Everything from toilet tissue and paper towels to copier and computer paper is purchased with recycled content. (City Ordinance, Chapter 1-12.3)

## Implementation and Enforcement

**Mandatory recycling affecting specific types of businesses** -- glass recycling for bars and restaurants, paper recycling for office buildings, food waste recycling for hotels, grocery stores, food manufacturers/processors, food courts and hospitals -- is enforced at the point of generation. The affected businesses are sent compliance forms annually, along with tip sheets to remind them of their responsibility to recycle. The City follows up with site inspections of businesses reported to be out of compliance and businesses that have requested compliance assistance, as well as with businesses that are randomly selected. If a business is not in compliance with the City's mandatory recycling ordinances, a Recycling Specialist will work with management to set up a recycling program or improve/correct a failing system and may initiate an administrative action against the businesses for violating ordinance.

The law also allows for the requirements to be suspended for any business if the cost to collect and recycle is more than the cost to collect and dispose of the targeted materials. Requests to suspend the requirements for

a business are directed to the City's Recycling Branch. Each case is evaluated individually. City Recycling Specialists meet with the business, assess the issues specific to that site and work with the business to set up a recyclables collection system. Through this process, the City's Recycling Specialist can determine whether recycling is feasible for the business and if the waiver provision should be applied.

Recycling and collection service companies that encounter businesses that are uncooperative or uninformed report those businesses to the City's Recycling Branch. City Recycling Specialists contact the business, clarify the requirements, and offer assistance.

**Disposal bans and restrictions** on high volume recyclable materials, including green waste, cardboard, tires, auto batteries, white goods and scrap metals, are enforced at City disposal sites. Inspectors monitor trucks unloading at the Waimanalo Gulch Sanitary Landfill and H-POWER to determine if a truckload is over the limit on restricted materials or contains any amount of banned materials. The offending vehicle can be denied access to City disposal facilities. The Refuse Division Chief determines the penalty and duration. The company, not the individual truck driver, is responsible for compliance of all trucks affiliated with the company.

## Education

Outreach and education are ongoing, including the annual tip sheets mailed with the compliance forms, onsite technical assistance during inspections, technical tours, and online guidelines and resources at Opala.org. The City collaborates with the State's Green Business Program to assist and recognize businesses for their recycling efforts.

The City's Opala.org website is a central source of resources for businesses. The Business Recycling page contains guidelines for designing and implementing recycling programs, model programs, peer consultants, waste prevention strategies, recycling equipment vendors, recycling companies and collection services, and graphics and media to assist with employee education. See EXHIBIT I on page 71.

Tour de Trash, now in its 20th year, is a popular award-winning education program that offers a behind-the-scenes look at successful recycling programs at island businesses and recycling and waste processing operations on Oahu. Tour attendees have an opportunity to talk with business and facility managers to learn more about establishing and expanding recycling for their own operations. The City offers four full-day tours annually, and for the 20<sup>th</sup> anniversary special, an additional tour was added: Construction and Demolition Recycling. Tour descriptions and schedules are online at Opala.org.

*WasteLine* is an e-newsletter that profiles successful community and business recycling programs, innovations and technology, and opens discussions on new directions in the City's waste management and recycling programs. Businesses (and others) can 'talk trash' and stay in the loop while connected to all the resources with a click of the mouse. Subscribe online at Opala.org, and find current and archived stories by topic and date on the *WasteLine* blog.

@HNL.Opala

@HNL\_ENV

The Refuse Division is now on social media! The Facebook page (@HNL.Opala) was published in November 2017, and the ENV Department-wide Twitter profile (@HNL\_ENV) started utilization by the Refuse Division in October 2017. Each week the Facebook and Twitter pages are updated with refuse and recycling program content, including updates, announcements, events, reminders, and more.

## Findings and Observations

Based on inspections conducted during fiscal year 2018, businesses appear to be generally supportive of recycling, although a handful of businesses were unaware or misinformed about the mandatory recycling laws. At the time this report was written, the response rate for the 2018 compliance form was approximately 74% for glass, 64% for office paper and 74% for food waste. All of these percentages have increased by at least 14% compared to the 2017 response rates. For the third year, responding to compliance requests was made easier through an application on the City's Opala.org website that allows businesses to more conveniently indicate their compliance online instead of mailing back a form. Survey responses will continue to be submitted throughout the rest of the calendar year, and City inspections will continue to target a combination of responding, non-responding and randomly selected businesses.

The goal of the City's enforcement efforts is to "catch them recycling," not to penalize businesses for non-compliance. With that in mind, starting in 2018, businesses are no longer notified before an inspection occurs. The Compliance Forms all note that inspectors can be dispatched at any time. Most often, in the event a business does not have a recycling program in place and receives a Compliance Form, they will call the City's Recycling Branch for assistance.

The majority of inspected businesses have established recycling programs and are in compliance with the recycling ordinances. If they're not, the Recycling Specialist provides educational materials and resources to implement or improve the program, and offers onsite technical assistance. A follow-up inspection is scheduled after 30 days.

City Recycling Specialists noted the following during inspections conducted during fiscal year 2018:

- Where applicable, recycling staff are coupling inspections for compliance with mandatory recycling ordinances and inspections for compliance with the City's plastic bag ban, per ROH Sections 9-9.1 through 9-9.4. Many businesses that are impacted by the recycling ordinances are retailers that are also impacted by the City's plastic bag ban. For those businesses, it's efficient to inspect them for compliance with all applicable ordinances at one time.
- The vast majority of those businesses impacted by the City's food waste recycling ordinance are continuing to use local piggeries to recycle their food waste.
- Most years there are a small number of potential violations reported to the City by residents. ENV will investigate all reports of violations. This year there was one food waste recycling complaint at a hotel.
- Inspection staff were pleased to find multiple bars donating their HI-5 bottles to the community, including Creations in Catering and multiple bars in Haleiwa, which donate bottles to school groups or to the homeless.
- Ala Moana Center is now managed by Keter Environmental. When it comes to solid waste management, Keter is very progressive in its approach to promoting waste diversion and recycling. Keter requires all stores within the Center to recycle paper, glass and food waste, even if the business is exempt under

City Ordinance. Keter has installed conveniently placed recycling receptacles and easy to read signage in service areas. Keter has expressed interest in working along side the City to assure all businesses are in compliance – a partnership the City will pursue.

- The City is in the process of revising its “Food: Too Good to Waste” food waste reduction guide and cookbook. Content was created by chefs from partner businesses who have shared creative tips and recipes to transform leftovers into local dishes. The booklets are distributed through partner restaurants and retailers. The updated versions will be available in late summer. A link to the online version of the book: [www.opala.org/solid\\_waste/pdfs/Food\\_Too\\_Good\\_to\\_Waste.pdf](http://www.opala.org/solid_waste/pdfs/Food_Too_Good_to_Waste.pdf).
- As of this writing, Recycling Specialists conducted 70 food waste inspections and issued 12 citations for violations; 30 glass inspections with 2 citations; 5 paper inspections with 0 citations; and 216 Plastic Bag Ban inspections with 27 citations. Inspections will continue throughout the rest of calendar year 2018.
- There were a higher number of violations this year compared to previous years. This may be due to multiple factors, including: the new Ka Makana Alii food court in Kapolei was inspected for the first time, inspections were conducted in more remote areas of Oahu with smaller businesses that may not have been inspected for a few years, more inspections were conducted at grocery stores, and less focus was put on large malls this year (most of which have been inspected within the last two years).

The ordinances requiring mandatory recycling of food waste, glass, and office paper include a provision that allows the owner of the business to petition the Chief of the Refuse Division to suspend the requirement if recycling service for the specified material is unavailable or if the cost of recycling exceeds the cost of disposal. No requests for exemption from the food waste recycling ordinance were granted during fiscal year 2018. As noted previously, the City suspended part of ROH subsection 9-3.1, which requires liquor-serving establishments to recycle their glass containers. The suspension applies to non-deposit glass only. Businesses are still required to recycle their HI-5 deposit beverage containers per ordinance.

Market values for office paper, newspaper and cardboard continued their steep decline in 2018. The downward pressure on market prices intensified significantly with China’s 2018 “Green Sword” initiative, which has drastically limited the amount of recyclable material China accepts from foreign countries. Prior to Green Sword, China was the worlds largest buyer of post-consumer recyclable material. In 2018, recyclable material brokers are having to find alternate (and often far less profitable) market options. Markets for recyclable materials have emerged in some Southeast Asian countries, but they are not large enough to fill the void left by China.

In previous years, higher values for these materials helped to offset collection and processing costs. However, collection costs for recyclables have risen in recent years as a result of low market prices. Glass has a consistently low market value and requires recycling subsidy. The majority of glass and beverage bottles are subsidized by the HI-5 deposit beverage container program. Non-deposit glass containers include most food containers and wine/spirit bottles. The recycling of non-deposit glass, which is managed under a program separate from the HI-5 fund, continues to struggle due to insufficient State funding. Food waste does not have a market value and requires special collection to contain and transport. Specialty organizations such as Hawaii Food Bank and Aloha Harvest handle foods suitable for human consumption.

Revised Ordinances of Honolulu  
Chapter 9 COLLECTION AND DISPOSAL OF REFUSE

**Sec. 9-3.1 Business.**

- (a) No person shall operate or maintain a business without arranging or providing for the collection of all refuse there from.
- (b) Where the collection of refuse is to be made by the division, the owner or occupant of the business shall prepare and place refuse for collection in the manner set forth in Section 9-1.4.
- (c) The owners of liquor-serving establishments shall arrange and provide for the separate collection and recycling of glass containers and the owners of office buildings shall provide for the separate collection and recycling of office paper, newspaper and corrugated cardboard. In so doing, liquor-serving establishments and office buildings shall not place those recyclable materials in the same containers as those holding refuse, or in a manner which causes or is intended to cause the collection of the recyclable materials with refuse. For the purposes of this subsection:
  - (1) "Liquor-serving establishment" means a business establishment that sells liquor or intoxicating liquor to be consumed on the premises of the establishment, and shall include bars, nightclubs, cabarets, taverns, and any restaurant where liquor or intoxicating liquor is sold for consumption on the premises, including restaurants within hotels and office buildings;
  - (2) "Liquor or intoxicating liquor" means the same as is defined in HRS Section 281-1.
  - (3) "Office building" means any building with, or group of connected buildings with an aggregate of, 20,000 square feet or more of office space, excluding common areas; provided that office space shall not include any portion of a building used for resort, retail or educational purposes.

An office building, as defined in this subsection, which is occupied by city agencies, in whole or in part, shall be subject to the requirements of this subsection, except where the city agencies are already participating in a recycling program under Section 9-1.11.

The owner of a liquor-serving establishment or office building may petition the chief for an exemption from the recycling requirements of this subsection in part or in full if the owner can demonstrate that the establishment or office building, as the case may be, does not generate a sufficient amount of the designated recyclable material to warrant separate collection for recycling.

The owner of a liquor-serving establishment or office building may petition the chief to suspend the applicability of this subsection to the applicant if the applicant demonstrates that recycling service for the items the applicant is required to recycle is unavailable to the applicant, or that the cost of recycling the applicable recyclable materials exceeds the cost of disposing of those same items at the HPOWER facility or the city's landfills. If the chief grants the application, the requirements of this subsection shall be suspended until such time as recycling service becomes available to the applicant, or the cost of the recycling service is less than or equal to the cost of disposal of the recyclable items at the HPOWER facility or the city's landfills. The chief shall, from time to time, review the availability and cost of the recycling service to those persons for whom the requirements of this subsection have been suspended. For the purposes of this subsection, the "cost of the recycling service" shall include only those costs that the recycler would charge the owner of a liquor-serving establishment or office building, whichever is applicable, for picking up and disposing of the items to be recycled, and the cost of disposal of the items to be recycled at the HPOWER facility or the city's landfills shall include the city's tipping fee and the cost of transporting the recyclable items to either of the aforementioned disposal facilities. If the chief determines that the requirements of this subsection shall no longer be suspended with regard to a particular liquor-serving establishment or office building, the chief shall notify the owner of the establishment or building by registered mail and such owner shall be required to recycle the appropriate items in accordance with this subsection within 60 days of receipt of the notice.

The chief may also suspend the requirements of this subsection during the period of a work stoppage or any other interruption of refuse collection service to the office buildings and liquor-serving establishments that are subject to this subsection.

The chief shall prepare and submit to the council an annual report on the progress of the implementation of this subsection. The report shall be submitted on July 1st of each year; provided that the first annual report shall be submitted on July 1, 1997.

(Sec. 9-3.1, R.O. 1978 (1983 Ed.); Am. Ord. 95-64)

Revised Ordinances of Honolulu  
Chapter 9 COLLECTION AND DISPOSAL OF REFUSE

**Sec. 9-3.5 Food waste recycling.**

(a) The owners of the following food establishments located within the City and County of Honolulu shall: (i) arrange and provide for the separate collection of food waste and for its recycling by a recycling facility in the city; or (ii) separate food waste from all other solid waste generated by the food establishment and deliver the food waste to a recycling facility:

- (1) A restaurant that occupies 5,000 square feet or more of floor area and serves 400 or more prepared meals per day based on an annualized average. If a restaurant is also a catering establishment, it shall be considered a restaurant for purposes of this section. If a restaurant has on its premises a place where the primary method of service, for all mealtimes, is food and drink orders taken and served to customers at a self-service counter, that portion of the premises devoted to the taking and serving of such food and drink orders, and any dining area serving customers of such self-service counter, shall not be counted in determining the square feet of the restaurant or the number of prepared meals served by the restaurant.
- (2) A food court as defined in subsection (g). The company or entity that manages the shopping center or building where the food court is located shall be required to comply with the requirements of this section unless the owners of the food establishments in the food court are responsible for the disposal of their refuse, in which case the owners of those establishments shall be responsible for complying with this section.
- (3) A hotel with a kitchen or kitchens and one or more function rooms. For the purposes of this subdivision, a "kitchen" means that place which is not part of a restaurant and where food is prepared for hotel employees or functions on the hotel's premises.
- (4) A market that occupies 18,000 square feet or more of floor area.
- (5) A food manufacturer or processor that occupies 5,000 square feet or more of floor area.
- (6) A catering establishment that is not also a restaurant or part of a restaurant and which serves or sells 400 or more prepared meals per day based on an annualized average.
- (7) A hospital which serves 400 or more prepared patient meals a day based on an annualized average.

For the purposes of this subsection, for the first year following January 1, 1997, \* the annualized average number of prepared meals served or sold per day by a food establishment shall be the average number of meals prepared per day in the year prior to January 1, 1997, \* for food establishments that have been in existence for one year or more prior to January 1, 1997. \* For establishments that have not been in existence for that length of time prior to January 1, 1997, \* the annualized average shall be determined based on the number of prepared meals served or sold per day during the first year that the food establishment has been in existence following January 1, 1997. \* Except as provided above, establishments shall use the prior year's average number of prepared meals served or sold per day in determining whether they are required to recycle their food waste in accordance with this section.

[\*Editor's Note: "January 1, 1997" is substituted for "the effective date of this ordinance."]

(b) This section shall not apply to any church or nonprofit organization except a hospital, as provided in subsection (a). Further, this section shall not apply to any food service establishment which offers as the primary method of service, for all mealtimes, food and drink orders taken at and served to the customer at a self-service counter; provided that this exemption shall not apply to food establishments in markets or establishments in a food court.

(c) The requirement to recycle food waste under this section shall be applicable only to the food waste from kitchens and food preparation, handling, and manufacturing or processing areas, and from dining areas where customers are served by waiters or waitresses, or where tables or meals are cleared away by employees of the business or establishment.

The requirement of this subsection shall not apply to commercial cooking oil waste or commercial FOG waste. Instead, the removal, transport, and disposal of such waste shall be subject to Chapter 14, Article 5A.

(d) A food establishment that is required to recycle food waste under this section may combine such waste with that of other establishments, or may separately collect and recycle its own food waste.

(e) All food establishments otherwise required to recycle food waste under this section shall not be required to do so if the disposal charge for disposing of food waste at a recycling facility in the city, including the cost of transporting the food waste to the facility, exceeds the tipping fee or disposal charge for disposing of waste at the HPOWER facility, as provided in Section 9-4.2, plus the cost of transporting refuse to such facility. The chief shall make this determination.

(f) The owner of a food establishment that is otherwise required to recycle food waste may petition the chief to suspend the applicability of this section to the applicant if the applicant demonstrates that recycling service for food waste is unavailable to the applicant. If the chief grants the application, the requirements of this section shall be suspended until such time as recycling service becomes available to the applicant. The chief shall, from time to time, review the availability of recycling service to food establishments for which the requirements of this section have been suspended. If the chief determines that recycling service is available and that the requirements of this section shall no longer be suspended with regard to a particular food establishment, the chief shall notify the owner of the establishment by registered mail and that owner shall be required to recycle food waste in accordance with this section within sixty days of receipt of the notice.

The chief may also, on the chief's own initiative, suspend the requirements of this section:

- (1) During the period of a work stoppage or any other interruption of recycling collection service to the food establishments that are subject to this section; or
- (2) Whenever the chief determines that there are inadequate recycling facilities or there is inadequate recycling capacity to dispose of the food waste being collected pursuant to this section.

(g) For the purposes of this section:

- "Catering establishment" means the same as defined in Section 21-10.1.
- "Composting facility" means an establishment that conducts either major or minor composting operations, as defined in Section 21-10.1.
- "Food bank" means a facility that receives donations of food for redistribution to needy groups, individuals or families.
- "Food court" means an area within a building or shopping center where five or more food establishments are situated and serviced by a common dining area.
- "Food establishment" means a catering establishment, food court, food manufacturer or processor, hospital, hotel, market, or restaurant.
- "Food manufacturer or processor" includes an establishment that generates food waste and is primarily involved in the manufacture or processing of food products, including animal products, but excluding baked goods.
- "Food waste" means the same as that term is defined under the definition of "recyclable materials" in Section 9-1.2.
- "Function room" means an area within a hotel where events are held at which food is served, including but not limited to wedding receptions, business meetings, conferences, banquets and parties.
- "Hospital" means the same as defined in Section 21-10.1.
- "Hotel" means the same as defined in Section 21-10.1.
- "Market" includes establishments where fresh meat, fish or produce is prepared, handled and displayed for sale at retail or wholesale.
- "Meal" includes any food item or items served as an entree at breakfast, lunch or dinner, but excludes beverages and desserts, if the beverages or desserts are served by themselves and not part of a breakfast, lunch or dinner
- "Prepared meals" means meals that have been cleaned, cooked, or otherwise prepared on the premises of the food establishment, and shall exclude prepackaged meals that are cooked or otherwise prepared elsewhere and only sold on the premises of the establishment. "Prepared meals" includes meals a portion of which have been precooked or prepared off the premises of the establishment.

- "Recycling facility" includes a composting facility, waste bioconversion facility, rendering facility, pig farm or other agricultural facility that uses food waste as animal feed or for other agricultural use, or any other facility that recycles food waste and is approved by the director for that purpose.
- "Recycling service" is a service or collection of services that includes the collection and transportation of food waste to a recycling facility by a refuse hauler or other company that collects the food waste, and the recycling or reuse of that food waste by a recycling facility, which may or may not be operated by the company that collects and transports the food waste.
- "Rendering facility" means an establishment that converts kitchen grease, cooking oils, meat scraps or other slaughterhouse waste, waste from meat processing plants, or any combination of the foregoing items, for use in the manufacture of such products as cosmetics, detergents, plastics, paints, tires and animal feed products.
- "Restaurant" means a place of business where food is served for compensation and includes the kitchen or food preparation area of that place of business, but excludes any portion of the establishment that is a bakery serving baked goods for consumption on or off the premises of the restaurant and excludes a quick-serve food service establishment which offers as the primary method of service, for all mealtimes, food and drink orders taken at and served to the customer at a self-service counter.
- "Waste bioconversion facility" means a facility where food and other organic waste are converted into useable byproducts.

(h) The department may adopt rules in accordance with HRS Chapter 91, having the force and effect of law, for the implementation, administration and enforcement of this section.

(i) Upon presentation of proper credentials, the director or the director's duly authorized representative, may enter at reasonable times any building or premises of a food establishment and inspect the books and records of a food establishment to determine compliance with the requirements of this section; provided that such entry and inspection shall be made in such a manner as to cause the least possible inconvenience to the persons in possession of the property and the owners of the food establishment; and provided further that an order of a court authorizing such entry and inspection shall be obtained prior to entry or inspection in the event that such entry or inspection is denied or resisted by the persons in possession or owners of the food establishment.

(j) On January 1, 1997\* and quarterly thereafter: (1) each waste bioconversion facility in the city shall report to the refuse division on: (a) how much private refuse haulers or other companies are being charged as of the end of the quarter being reported, per unit of weight or volume, for disposing of food waste at the bioconversion facility, and how much the facility is charging per unit of weight or volume, if the facility both collected and disposed of food waste from a food establishment; (b) the amount of food waste, per unit of weight or volume, that the facility recycled during the previous quarter; and (2) each refuse hauler or other company that collects and transports food waste shall report to the refuse division on how much, per unit of weight or volume, the hauler or company charged food establishments as of the end of the quarter being reported to collect and dispose of their food waste.

(k) Nothing in this section shall preclude a food establishment from donating leftover or unsold food that is safe to consume to a food bank.

(Added by Ord. 96-20; Am. Ord. 99-32, 02-14)

[\*Editor's Note: "January 1, 1997" is substituted for "the effective date of this ordinance."]

## FOOD WASTE (FRONT)

DON'T DUMP ON HAWAII. SORT IT OUT.

## FOOD WASTE RECYCLING - Tips and Guidelines

### You Can Recycle

Vegetable and Fruit Waste  
Eggs  
Meat and Fish Waste  
Dairy Waste  
Bakery Waste  
Noodles  
Rice  
Cooking Oil (collected & recycled separately)

- It's The Law
- Going Green Is Good For Business
- Collection Options

### It's The Law

City & County of Honolulu Ordinance, Chapter 9, Article 3.5 requires the owners of food establishments located within the City and County of Honolulu to: 1) arrange and provide for the separate collection of food waste and for its recycling by a recycling facility in the city or 2) separate food waste from all other solid waste generated by the food establishment and deliver the food waste to a recycling facility.

To be in compliance with City law, restaurants, food courts, hotels, grocery stores, food manufacturers/processors and hospitals meeting the following criteria are required to recycle food waste.

- Restaurant that occupies 5,000 square feet or more of floor area and serves 400 or more prepared meals per day
- Food court in a building or shopping center where five or more food establishments are situated and serviced by a common dining area
- Hotel with one or more kitchens, and function rooms
- Grocery store that occupies 18,000 square feet or more of floor area
- Food manufacturer or processor that occupies 5,000 square feet or more of floor area
- Catering establishment that serves or sells 400 or more prepared meals per day
- Hospital that serves 400 or more prepared patient meals per day

*note: Meals per day are based on an annualized average*

### You Can't Recycle With Your Food Waste

Plastic  
Plastic bags  
Metal  
Wood  
Glass  
Cardboard  
Large amounts of paper  
Landscape clippings

Check with your collector to verify acceptable materials.

### Going Green Is Good For Business

Recycling is not only the law, it is also the smart thing to do. It's good for business and good for the environment. Keeping food waste out of the dumpster lowers disposal costs, and recycling food waste and other materials helps to extend the life of our landfill. We all need to work together to reduce waste and promote sustainable waste management.

## GLASS (FRONT)

## DON'T DUMP ON HAWAII. SORT IT OUT.

## GLASS RECYCLING - Tips and Guidelines

- It's The Law
- Going Green Is Good For Business
- Collection Options

**It's The Law**

City & County of Honolulu Ordinance, Chapter 9, Article 3.1 requires the owners of liquor-serving establishments to arrange and provide for the separate collection and recycling of glass containers.

**Effective June 1, 2014**, the City and County of Honolulu temporarily suspended the applicability of subsection 9-3.1 of the Revised Ordinances of Honolulu, requiring liquor-serving establishments to arrange and provide for the separate collection and recycling of glass containers, for any business unable to access recycling services. **This suspension pertains to non-deposit glass only. Businesses are still required to recycle HI-5 deposit beverage containers per ROH subsection 9-3.1.**

To be in compliance with City law, liquor-serving establishments must recycle all HI-5 glass bottles generated from their business.

**Recycle:** Deposit glass bottles - means beer, ale, or other drink produced by fermenting malt, mixed spirits, mixed wine, tea and coffee drinks, soda, or non carbonated water, and all nonalcoholic drinks.

**Do Not Recycle:** Drink glasses, plates, cups, window panes, and mirrors.

**Going Green Is Good For Business**

Recycling is not only the law, it is also the smart thing to do. It's good for business and good for the environment.

Recycling offers an opportunity to reduce refuse costs. If you throw all of your glass in a dumpster, you pay twice – once to haul it away and again to dispose of it. With less waste in your dumpster there is an opportunity to lower your disposal cost.

Glass accounts for approximately 34,000 tons per year of Oahu's waste stream. Recycling glass and other materials will help to extend the life of our landfill. We all need to work together to reduce waste and promote our island's sustainability.

768-3200 opala.org

## GLASS (BACK)

**Collection Options**

Collectors and recycling companies may offer various collection/recycling service arrangements (see list below). You can also do it yourself using in-house maintenance personnel and/or volunteer employees to take HI-5 bottles to redemption centers. Find the redemption centers near you by going to [www.opala.org](http://www.opala.org).

## OFFICE PAPER (FRONT)

DON'T DUMP ON HAWAII. SORT IT OUT.

## OFFICE PAPER RECYCLING - Tips and Guidelines

- It's The Law
- Going Green Is Good For Business
- What To Recycle
- Collection Options

### It's The Law

City & County of Honolulu Ordinance, Chapter 9, Article 3.1 requires the owners of office buildings to arrange and provide for the separate collection and recycling of office paper, newspaper and corrugated cardboard.

To be in compliance with City law, any office building or group of connected buildings with an aggregate of 20,000 square feet or more of office space are required to recycle office paper, newspaper and corrugated cardboard.

### Going Green Is Good For Business

Recycling is not only the law, it is also the smart thing to do. It's good for business and good for the environment.

Recycling paper offers an opportunity to reduce refuse costs by reducing the volume of waste collected and taken for disposal.

Paper accounts for approximately 23% of the waste stream on Oahu. Recycling paper and other materials will help to extend the life of our landfill. We all need to work together to reduce waste to promote our island's sustainability.

### What To Recycle

High-grade paper (white and color ledger) which is generated in larger quantities, has stable markets and commands a higher price. Low-grade papers are in less demand, so dealers pay less (and sometimes nothing) for them. Higher volumes of high-grade papers can help to defray the costs to collect the low-grades, and can significantly reduce your disposal costs.

#### You Can Recycle

Colored ledger paper including:  
 Yellow legal paper  
 Color stock copier paper  
 Carbonless multi-copy forms  
 Corrugated cardboard  
 File folders  
 Newspaper  
 White ledger paper including:  
 Copier paper  
 Black inked "blue" prints  
 Staples need not be removed.

*Check with your collector to verify acceptable materials.*

#### You Can't Recycle

Bindings: glued, metal, spiral  
 Blue inked blueprints  
 Carbon paper  
 Envelopes  
 Labels, adhesives, tape  
 Paper bags, plates, cups  
 Paper clips, binder clips  
 Paper towels, napkins  
 Photographs  
 Rubber bands  
 Tissue  
 Glossy magazines  
 Telephone books  
 Shredded paper

768-3200 opala.org

## OFFICE PAPER (BACK)

**Collection Options**

Collection service can be provided by most refuse or recycling companies, or by small private collectors. A refuse hauler may offer a combined cost/pay structure to handle both refuse and recyclable paper whereby they charge you for the collection of both refuse and paper and credit the current market value on the paper. This can reduce your overall disposal costs. Similarly, a recycling company or a small collector may charge you for the collection service and credit you the current market value on the paper or collect it for no charge/no pay.

**Refuse Haulers**

It is best to start with your current refuse hauler. You may also check online or the yellow pages of your phone book for refuse haulers.

**Business Recycling**

Many Oahu businesses are already engaged in recycling. Recycling at work can reduce costs as well as reduce waste on Oahu. Most Oahu businesses are affected by one or more of the City's mandatory recycling laws or regulations. If your business needs assistance in getting started or improving your recycling program, this website offers the following resources:

CHIEF**FOOD WASTE RECYCLING COMPLIANCE FORM 2018**

January 29, 2018

**Business Name**  
**Business Address**  
**City, State Zip Code**

Revised Ordinance of City & County of Honolulu, Sec. 9-3.5 requires large restaurants, grocery stores, hotels, hospitals, food courts and food manufacturers and processors to recycle food waste. In so doing, these establishments shall not place food waste in the same containers as those holding refuse. City representatives conduct random inspections of businesses affected by this law.

To verify your compliance with this law, we must obtain information about your current food waste recycling program. Please complete this form, including signature, and **return by March 16, 2018**.

**NEW:** Complete this Form Online at [www.honolulu.gov/opala/compliance](http://www.honolulu.gov/opala/compliance).

You may also mail form by folding in thirds, fax to 768-3434, or scan-email to [miya.devoogd@honolulu.gov](mailto:miya.devoogd@honolulu.gov).

**Company and Address** (if different than above): \_\_\_\_\_

**Contact person:** \_\_\_\_\_ **Title:** \_\_\_\_\_

**Phone number:** \_\_\_\_\_ **Email:** \_\_\_\_\_

Check appropriate box:

- ☐ Business is in **compliance** – food waste is not disposed with refuse.

Approximate quantity of food waste recycled **per month**: tons \_\_\_\_\_ **or** gallons \_\_\_\_\_

Recycling Company: \_\_\_\_\_

- ☐ Business is **not** in compliance and needs assistance.

Explain: \_\_\_\_\_

- ☐ Business is not subject to this ordinance. Reason:

☐ Restaurant that serves less than 400 meals per day

☐ Restaurant occupies less than 5,000 square feet

☐ Market that has less than 18,000 square feet

☐ Food manufacturer or processor that occupies less than 5000 square feet

☐ Other – reason: \_\_\_\_\_

If you have questions or need assistance, contact Miya DeVoogd at [miya.devoogd@honolulu.gov](mailto:miya.devoogd@honolulu.gov) or 768-3448. Recycling information is also available online at **opala.org**.

**If this form is not completed online or returned, an inspector will be dispatched to your establishment to verify compliance. Businesses not in compliance are in violation of City ordinance and may be subject to penalties.**

I certify that the foregoing statements are correct to the best of my knowledge.

CHIEFGLASS RECYCLING COMPLIANCE FORM 2018

January 29, 2018

Business Name  
Business Address  
City, State Zip Code

Revised Ordinance of City & County of Honolulu, Sec. 9-3.1 requires all liquor-serving establishments to arrange and provide for the separate collection and recycling of glass containers. In so doing, liquor-serving establishments shall not place glass bottles and jars in the same containers as those holding refuse. City representatives conduct random inspections of businesses affected by this law.

To verify your compliance with this law, we must obtain information about your current **glass** recycling program. Please complete this form, including **signature by the owner or general manager** certifying its accuracy, and **return by March 16, 2018**.

**New:** Complete this Form Online at [www.honolulu.gov/opala/compliance](http://www.honolulu.gov/opala/compliance).

You may also mail form by folding in thirds, fax to 768-3434, or scan-email to [miya.devoogd@honolulu.gov](mailto:miya.devoogd@honolulu.gov).

**Effective June 1, 2014**, the City and County of Honolulu temporarily suspended the applicability of subsection 9-3.1 of the Revised Ordinances of Honolulu, requiring liquor-serving establishments to arrange and provide for the separate collection and recycling of glass containers, for any business unable to access recycling services. **This suspension pertains to non-deposit glass only.** The majority of glass bottles from your business may be included in the HI-5 Beverage Container Deposit Program (e.g. beer, malt beverage, wine cooler, drink mix). **Businesses are still required to recycle HI-5 deposit beverage containers per ROH subsection 9-3.1.**

**Company and Address** (if different than above): \_\_\_\_\_

**Contact person:** \_\_\_\_\_ **Title:** \_\_\_\_\_

**Phone number:** \_\_\_\_\_ **E-mail:** \_\_\_\_\_

## Inspection Procedures for Mandatory Recycling Compliance

### I. Pre-inspection

1. Select businesses for inspection from mandatory recycling data bases (food waste, glass, and office)
2. Contact property management to schedule a day and time range (for paper recycling)
3. Create inspection schedule

### II. Inspection Process

1. Ask for a briefing of their recycling efforts and a tour of the facility.  
 Explain purpose. Example: I'm here to check your compliance with the City's mandatory recycling laws. Your business is required to recycle (glass, food waste, paper). I would like to see your recycling program. The inspection will take approximately 15 minutes. If you are unavailable, please have another co-worker show me around. We will debrief after the inspection. To conclude, I will have a form for you to sign.
2. Site inspection
  - a. **Glass**
    1. Check bar site(s) for separate collection
    2. Check collector pickup location - look inside bins
    3. Check refuse dumpsters for glass
    4. Ask for name of collector
    5. If applicable, encourage the business to reduce the amount of non-glass contamination in recycle bin
    6. Offer suggestions/assistance (may include collector information, peer consultant for a similar business, appropriate fact sheets, training tips)
  - b. **Food waste**
    1. Check kitchen for separate collection from preparation area and dining areas where meals are cleared away by employees of the business
    2. Check collector pickup location
    3. Check refuse dumpsters for food waste
    4. Ask for name of collector
    5. Offer suggestions/assistance (may include collector information, peer consultant for a similar business, appropriate fact sheets, training tips)
  - c. **Office paper**
    1. Check generation points for separate collection containers (e.g., photocopy machine, computer center, individual desks)
    2. Check collector pickup location
    3. Check refuse dumpsters for office paper
    4. Ask for name of collector
    5. Offer suggestions/assistance (may include collector information, peer consultant for a similar business, appropriate fact sheets, training tips)

### III. Conclusion

1. Complete Mandatory Recycling Compliance Inspection form. Get name (printed), title, email and signature of manager or contact person.
2. Leave copy of Tip Sheet if needed

### IV. Post-inspection

1. Update appropriate database with information from inspection forms. Email a copy of the form to the contact. If no email was provided, mail a copy of the form.
2. If in violation, send a Notice Of Violation through certified mail. Schedule follow-up visit (NOTE: preferable that same inspector conduct follow-up inspection). If still in violation during the follow-up inspection, send Notice Of Order through certified mail; business must pay the associated fine.

**Mandatory Recycling / Plastic Bag Ban Compliance Inspection**

Business Name:	_____
Business Address:	_____
Type of Business:	_____
Contact Person:	_____
Title:	_____
Signature:	_____

This business has been inspected by the City and County of Honolulu Recycling Branch.

Date: \_\_\_\_\_ Inspector(s): \_\_\_\_\_

This business has been found to be:

In compliance with the City and County of Honolulu ordinance(s) regarding:

**NAME OF RECYCLING COMPANY**

_____	FOOD WASTE RECYCLING	_____
_____	GLASS RECYCLING	_____
_____	PAPER RECYCLING	_____
_____	PLASTIC BAG BAN	_____ compostable _____ recyclable paper _____ reusable _____ does not provide

COMMENTS: \_\_\_\_\_

In violation of the following City and County of Honolulu ordinance(s):

- \_\_\_\_\_ Revised Ordinance of City & County of Honolulu Sec. 9-3.5 requires the owners of **restaurants, food courts, hotels, markets, food manufacturers, caterers, and hospitals** to arrange and provide for the separate collection of **food waste**.
- \_\_\_\_\_ Revised Ordinance of City & County of Honolulu Sec. 9-3.1 requires the owners of **liquor-serving establishments** to arrange and provide for the separate collection and recycling of **glass** containers.
- \_\_\_\_\_ Revised Ordinance of City & County of Honolulu Sec. 9-3.1 requires owners of **office buildings** with 20,000 square feet or more of office space to provide for the separate collection and recycling of **office paper, newspaper and corrugated cardboard**.
- \_\_\_\_\_ Revised Ordinance of City & County of Honolulu Sec. 9-9.1 through 9-9.4 regulates the use of **plastic bags** on Oahu.

**Businesses found to be in violation must take immediate corrective action. Businesses that violate these City ordinances shall be subject to enforcement actions, including the imposition of civil fines.**
